

Asset Retirement Services

Reduce the costs and liabilities
of idle technology

Why Motor City Computer?

The resources to consistently meet your needs, whether you manage 100 PCs or 100,000

A 30,000-square-foot, high-cube-racked warehousing facility that remarkets more than 19,000 assets monthly

An established reseller network with the contacts and knowledge to recover maximum value

Adherence to our proprietary project management methodology to ensure you receive the highest quality service

Summary: Staying on top of today's rapidly advancing hardware and software changes can often leave you with idle assets—desktops, laptops, printers, and other equipment that no longer meet your business requirements but still represent a significant investment. By handling most aspects of asset retirement for you, Motor City Computer maximizes the value of your obsolete technology, eliminates liability associated with data security and EPA-compliant recycling, and frees up your IT staff and resources for other priorities. In addition, our national network enables us to deploy teams of skilled professionals on a local and national scale, to provide services whenever and wherever you need them.

Asset Retirement Services

Motor City Computer offers full-service management of the asset retirement process to target the hidden value in your IT assets and return it to you. We process assets from any size organization and provide customized services tailored to your unique requirements, which may include remarketing, recycling, staging, and redeployment services.

Motor City Computer provides a single point of contact to interface with your team and site contacts to manage all aspects of the asset retirement process. We help you to eliminate your exposure to future liability associated with data erasure or destruction, EPA regulations, and proper handling of assets.

Remarketing: Our 20+ years of remarketing experience means we're able to yield top returns, by processing a wide variety of technology, configuration levels, and varying degrees of functionality.

Recycling: Motor City Computer offers a comprehensive recycling service in strict compliance with state and federal EPA regulations. Reporting details all serial numbers and includes a Certificate of Recycling.

Staging and Redeployment: Full capabilities for shipping new and/or refurbished assets to customer locations whenever and wherever needed.

Features

- Full-service logistical services to address on-site packaging and shipping
- Complete audit and detailed inventory report of your idle, excess, or obsolete assets and their disposition
- Remarketing of systems through an established and effective international sales network
- Redeployment of upgraded and refurbished machines into the workplace
- Disposal of obsolete assets according to EPA regulations, with Certificates of Recycling
- Monthly status reports and revenue-sharing payments from remarketed assets
- Multiple locations nationwide, with a hub in your geographic area

Benefits

- Reduce your total cost of ownership
- Alleviate the significant burden and cost of refocusing your IT team on an internal asset retirement project
- Simplify your asset retirement process with a single point of contact and efficient management program
- Protect your confidential information, licensed software, and safeguard your company from the legal liability of improperly disposed equipment
